600 +

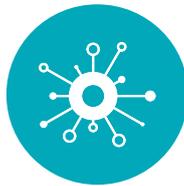

2G/3G /4G NETWORKS

We are an MVNO managing our direct carrier relationships, constantly pushing technology and resilience to create the best possible service for broadcasters around the world.

At Velos IoT we deliver 24/7 connectivity from the world's hotspots to contribution ingests in numerous MCR's globally. With over a decade of working with the broadcast industry, we understand the needs and provide the solutions.

Private encrypted
global APN

Hardware-agnostic
connectivity

Full operator-level
control of SIM and
analytics
